

Do more with the Apple device you love.

With integrated Wi-Fi and four hours of battery life, Kingston's new Wi-Drive offers pocket-sized portable storage and easy file sharing for Apple devices, including iPod touch® Gen 3 & 4, iPhone® and iPad®. Accessing or sharing your personal media has never been easier. With Wi-Drive, you can add another 16 or 32GB of space accessed wirelessly from your digital device. The content can be shared by three people so you are no longer limited to the space available within your iPad, iPhone or iPod touch.

Whether at home, by the pool or on the road, Wi-Drive lets you take more content with you without running out of storage space. Just back-up your files before you go and wirelessly access them from Wi-Drive when you need them.

Kingston's Wi-Drive offers great:

- Portability: Wi-Fi enabled so you can take your favorite media with you — and not be tethered to your computer. Just use your digital device as a player and display.
- Expanded storage: Wi-Drive adds up to 32GB of storage space for more of your favorite music, photos, videos, PDFs and more. It's also a great companion for Windows users on iPads, as it removes the frustration of using auto sync to view content.
- Casual Sharing: Wi-Drive lets you share your favorite media with three users simultaneously — without any hassles.

Access to the drive is done over the 801.11 g/n protocol, just like your typical home wireless hub, with a password. Carry extra files and content with you and use your iPad, iPhone or iPod touch as a display to share information.

Best of all, Wi-Drive is backed by legendary Kingston® reliability, 24/7 tech support and a one-year warranty.

-
- > Works with iPad, iPhone, and iPod touch
 - > Share your data with 3 users simultaneously
