### Seagate Backup Plus, easy backup for your digital life on your computer and the cloud

The Seagate® Backup Plus portable drive simplifies backup for consumers who want to protect their entire digital life locally, in the cloud or from social networks. Via the Seagate Dashboard, use the *Protect* function to set up a one-click plan or customize your scheduled local backup. Keep multiple copies of your files in case disaster strikes.

With the *Save* feature, user-generated content can be backed up from your favorite social networks. Many people now use their smartphones to capture priceless moments. While these devices are handy and readily available, storage is not their strong suit. Capture a memory, post it on a social networking site and let the Seagate Dashboard automatically back up any content posted. Even if the file gets accidentally deleted from the device, another copy can be waiting.

The *Share* feature allows multiple files to be uploaded to social networks at once from your computer. The days of uploading individual files without creating a new album are gone! Simply select files to upload, choose where to post them and even add comments. Managing your social profile has never been easier.

Install the pre-loaded NTFS driver for Mac, and use the drive interchangeably between PC and Mac® computers without reformatting the drive. For even more flexibility, with the Seagate Backup Plus design, you can upgrade from the included USB 3.0 interface to Thunderbolt™ technology or FireWire® 800 with the available additional adapter.
